SECRET

SOUTH CENTRAL CHINA TARGET STUDY

This memorandum is in answer to a request from D/GG for information concerning the power grid of several Chinese cities. A search was made of Navy and Air Force photographic files to obtain large scale aerial photography that was required for the project. The only city that was adequately covered was Shanghai.

The requester supplied existing diagrams of the power grid systems. An interpretation was made of World War II and [REDACTED] photography in an attempt to confirm the locations of power stations, sub-stations, and principal power lines. All information and confirmation was supplied to the requester in the form of annotations on the requester's own maps.
